How to Check Out eBooks Using Axis 360

Alamance County Public Libraries offers eBooks through Axis 360 and you can read these books on a computer or mobile device. **eBooks are checked out for three (3) weeks or twenty-one (21) days and you can only have five (5) eBooks checked out at one time. You can return your item(s) early through the Axis 360 app.** You can use Axis 360 on most devices but NOT basic Kindles or Nooks.

1. You will need to have your Library Card and PIN number to use our eBook services. If you do not know your Library Card number or PIN, you will need to go to your local branch to replace the card ($1.00) or reset your PIN. The Library does not give out Card numbers (in person or over the phone) nor do we reset PINs over the phone.
   a. If you are still not able to access our eBook services, you might have overdue items or over $5.00 in fines on your account. You will need to go to your local branch to find out.

2. To begin checking out eBooks from Axis 360, go to the eBook website titled Magic Wall by Baker & Taylor, which is acpl.axis360.baker-taylor.com (type this in your browser's address bar). Click on the link titled "Login" at the very top right corner of the website. Enter your Library Card number and PIN and you will be able to see all eBooks that the Library has available.

3. The homepage of the Axis 360/Magic Wall site is how you can search for eBooks you want to check out. There are many ways to search for eBooks:
   a. You can use the genre options on the left hand side of the list of eBooks to see books of those genres.
   b. You can also use the options above the list of eBooks to see what was just added to the database, what is newly released, what is popular among readers, or eBooks you might not come across in your search.
   c. You can search for specific eBooks by clicking on the magnifying glass on the right corner above the list of eBooks to search by keyword(s), title or author.
   d. You can also use the Browse By Subject tab below the ACPL logo on the left corner of the site to find books by genre.

4. Once you find a book you are interested in checking out, click on the photo of the book cover. This page will give you a short overview of the book, details of the book (including a summary) and any reviews made about a book. You can click on the links titled "Overview," "Details" and "Reviews" to see this information.

5. On the right side of the book cover is the information and links you need in order to check out an item.
   a. You can see how many copies the library has that can be checked out and how many are available to be checked out.
   b. You can see the different subjects that have been associated with this book. This can help when searching for books based on subjects (you can see the link to do this at the top left corner of the page titled "Browse By Subject").

c. You can also add this item to your "shopping cart" to be checked out later, check out an item immediately, or create a Wish List of books you want to read later on. Adding books to your "shopping cart" allows you to check multiple books out at the same time instead of having to check each one out individually.

6. Beneath the book you have chosen, there will show recommended books that are also available to be checked out and are similar in subject(s) to the one you chose.

7. Once you have decided to check an eBook out, click on Check Out to read it.

8. If you want to add multiple books to your "shopping cart" before checking out, add them to your cart first. At the very top right corner of the page, you will see a link titled "My Checkout List" and this is where you will go to check all of these out at the same time. After you have added the books you want to check out to your list, you can click on the Check Out icon (it is a picture of a book with a green check mark in the top left corner of the page) to the right of the area where it says how many items you can check out and how many items you have checked out.
   a. Any items that cannot be checked out immediately have a hold list and will be added to your Holds and you will be notified when it is ready to be checked out.

9. It is very likely that newly released eBooks are going to have a wait list and when you have added your request to that list, you will be notified promptly by email when it is available for you to check out.

Using eBook Apps

All of the eBook apps needed to read your eBooks are FREE on most platforms. You will need to be connected to a wireless network or have a data plan that allows you to connect to the internet.

The app you need to browse through, download and read eBooks that you check out is called **Axis 360**.

Your account login information for Axis 360 is your Library Card Number and your PIN. You will need to add your email address and name if you want to receive email notifications when books are ready to be checked out or when books are due. To find the app store app for your device, check below:
